

Bridgit™ conferencing software

Complete conferencing solution

Whether you're meeting and working with people across town or around the world, Bridgit™ conferencing software offers a simple and affordable way to share voice, video and data over the Internet. It's quick, it's easy – it's a complete conferencing solution.

Affordable and effective

With just an Internet connection, you can write over any application or share your desktop with other participants and talk them through any scenario – all in real time, right from your desk or from a SMART Board™ interactive whiteboard.

Reduce travel costs, make decisions quickly, engage audiences with dynamic content and keep projects on track by including all stakeholders in your meetings no matter where they are in the world.

It's about time

Bridgit software takes the clutter out of conferencing and helps you get things done. Simply name your conference, invite your participants and launch your session. In less than a minute you can respond to a client, get feedback from colleagues, start a training session or follow up with a sales prospect.

Works with the

SMART Board™
interactive whiteboard

Join

**Invite participants to your conference
with a simple e-mail invitation.**

Share and collaborate in real time

Communicate with ease

- **Simple conferencing** – Connect quickly to anyone with an Internet connection and share voice, video and data. You can start or join a conference at any time, right from your desktop. Participants can join your meeting through a simple e-mail invitation.
- **Automatic invitations** – Send invitations with an automatically generated e-mail.
- **Easy sharing** – Share desktops instantly and alternate desktop sharing. Participants can see anything you run on your desktop, such as spreadsheets, presentations or websites.
- **Desktop notes** – Highlight information by writing over a shared desktop. More than one participant can write at the same time.
- **Remote control** – Take control of another participant's desktop to demonstrate a solution or provide technical assistance.
- **SMART Board interactive whiteboard integration** – Write directly onto an open Notebook™ file when you use Bridgit software with a SMART Board interactive whiteboard (optional).
- **Language support** – Enhance communication with Bridgit software's support for 13 languages. You can easily switch between languages directly from the interface.

Interact with participants

- **Built in VoIP** – Hear all participants in the conference without purchasing an additional audio conference bridge or incurring long distance charges. Works with your existing microphone headset or room conference microphone.
- **Multipoint webcam support** – Allows participants to see video from up to four participant sites.
- **Instant messages** – Chat anytime during your meeting with individuals or the whole group.

Facilitate conferencing

- **Presentation tools** – Direct attention with the pointer tool to focus on a specific screen area.
- **Simple toolbar** – Access the on-screen tools quickly.
- **Secure and reliable environment** – Protect information with password options and SSL encryption.
- **Purchase options** – Subscribe to a monthly plan or host Bridgit software on your own server.

System requirements

System requirements Windows® operating systems

- 128 MB of RAM (256 MB RAM for webcam support)
- Pentium III 800 MHz
- Windows 98, Windows Me, Windows 2000, Windows NT® 4.0 operating system, Windows XP, Windows Vista™ operating systems
- 56 Kbps Internet connection (broadband required for webcam support)

Macintosh computers

- 256 MB of RAM (512 MB RAM for webcam support)
- G4 1 GHz (G4 1.42 GHz for webcam support)
- Mac OS X 10.3.9 and 10.4.X operating system
- 56 Kbps Internet connection (broadband required for webcam support)

Server requirements

- 800 MHz Pentium III processor, 512 MB RAM
- Windows 2000, Windows XP, Windows Vista or Windows operating systems
- Windows Server® 2003 operating system
- Windows operating system software or Novell® NetWare® software 6.0
